## 4X-CLUB Review

(Author Bravehoststamps )

### Program Description

4xClub is a strictly private program involved in currency trading on Forex. The company's work is based on complete transparency, with the trading history being available to its members at any time. The program's financial records are subject to permanent update and publication on the program's website. Upon being invited to the program, you are required to make a deposit within the first three weeks – otherwise, your account will be deleted and membership terminated. 4xClub is always open to any verification of its business and the audit is performed on a monthly basis. The company strictly abides by international laws to exclude the possibility of illegal financial activities taking place within its program.

### Business Model

The program's concept is based on purchasing its electronic shares as a form of securing one's deposit. The price for the shares is constantly increasing as the company's activity on Forex progresses. The average monthly increase is currently fixed at 8-15%. Shares can be liquidated (sold) at any time after the initial holding period of 30 days. Once you do it, the corresponding amount of money appears on your internal account balance, available for withdrawal. Both for deposits and withdrawals the program is using the following payment options: bank wire, E-gold, and E-bullion. If funds are being withdrawn via the above-mentioned e-currencies, a 3% fee is applicable. If you wish to avoid the withdrawal fee, you can request a regular check to be mailed to you. The minimal deposit is US\$1000 at no maximum being imposed. You can invite new members to the program only if you have not less than US \$20 in the company's shares.

A screenshot of the 4X-Club website's 'Overview' page. The page has a yellow background with a blue header. The header contains the word 'Overview' in a cursive font. Below the header, the text reads 'Welcome to 4X-Club'. There are three main sections of text: 'Distinction', 'Transparency', and 'Participation'. To the right of the text is a vertical navigation menu with a 4X CLUB logo at the top and several buttons: 'Overview', 'Questions', 'Our Performance', 'Contact Us', 'Legal Notice', and 'Log Out'. The 'Overview' button is selected, indicated by a small circle to its left.

*Overview*

Welcome to 4X-Club

**Distinction.** We are a group with a different plan. We realize that what you're really looking for is a reliable yet transparent plan. **That's why we have two universally trusted internet investors familiar with trade accounts who log onto the club's account in order to report back to you the membership! (Jeff Valasek and Simon Pink)**

**Transparency.** We show our financial transparency by allowing the fund generation system to be viewed. Hearing how a FOREX account is doing and actually seeing how the account is doing are two very different things.

**Participation.** Members participate in 4X-Club by buying Club shares. As the share price goes higher than the price you paid for your shares, the value of your shares increases proportionately. In order to buy shares you must first deposit funds to your 4X-Club online account. After a brief hold on new deposits has elapsed, you may buy shares whenever you choose, but you are never obligated to do so. Current price per share is

## Website and Customer Support

The company maintains a very professional website, with an SSL certificate being used. The internal account is clearly structured and subdivided into separate sections, enabling members to conduct different operations with their shares (such as purchase and redemption). An extensive customer support is offered via e-mail, with a response being provided within the next 24 business hours.

## Our Opinion

Despite the fact of the company remaining private throughout its entire history, it is quite well-known to online investors. It has been additionally verified that the reported financial operations on the global currency market have really been conducted by the company's traders. With the publication of a Legal Notice on the program's website, 4xClub has declared its legitimacy and willingness to abide by international business regulation. The members are fully responsible for any taxes, incurring from the profits they receive, and are allowed to participate only if it does not contradict the law of their countries. 4xClub has recently been added to the Feeder Fund pool, known for its precise verification procedure, preceding its cooperation with any investment program. Taking into consideration the serious business approach the company is pursuing, we tend to believe in its longevity and further growth.
