## ITS Review

(Author Bravehoststamps )

### Company Information

ITS (Index Trading Systems) corporation was founded in 2000 with a status of an Open Ended Investment Company (OEIC). The company's primary activity is concentrated upon IndExtreme Stock (IEX) which involves a combination of multiple trading strategies with a wider spread of positions within various financial markets. Besides that, IEX includes a portfolio of positions managed within individual company stocks (the so-called "blue chip organizations"). All of the above-mentioned enables the company to generate high monthly returns which fluctuate within the 8%-15% range. The minimal direct investments with ITS are currently fixed at \$1000 USD (for IndExtreme Stock units) and \$100 (for IndEXpress stock units). However, smaller amounts (not less than \$50 USD) can be deposited via the Feeder Fund pool at <http://www.feederfund.net> .

### Investment Process

At present, the company accepts deposits via e-gold, e-WorldPayments, BE-Cash, and Moneybookers. Further payment methods are being investigated and may be added at a later date. The company doesn't accept payments by check due to the longevity of their processing and clearance. The registration fee for permanent membership is \$25 USD. However, if no units are purchased within one month, the fee is refunded to the payee (with minor service charges being deducted from the total amount). Also, every time a stock is sold, a transfer fee of 2% (min. \$0.25 USD) is charged. Paid orders are converted into stocks the same day an order is received. The company doesn't allow its clients to register accounts with false names. In case of a doubt about a client's identity, certain identification documents can be requested. If a client fails to submit copies of this documents, the investment is refunded to the account it came from, and co-operation with this client is terminated. Once stock units are sold by a client, payout is made within 10 banking days (for amounts not higher than \$5000). The larger the payout is, the more time it takes to process it. A complete loss of money is possible only if the company whose stock you have purchased becomes bankrupt. ITS doesn't fall under any tax jurisdiction of any country, and no taxes are charged in the process of transferring profits to a client's account.

## Program's Website

ITS owns an advanced password-protected website with many features available for the company's clients. The site displays detailed performance charts which are updated every time a new trading operation occurs. After registration, each member can test the system for free for the period of 30 days. ITS provides IP-based registration to ensure complete security of members' accounts.

## Our Opinion

We view ITS as a mediator between investors and stock markets. The company's successful performance in the past, altogether with a high level of experience of its traders and their perfect reputation, serves as the best proof of its sustainability and credibility. Our advice goes towards the importance of diversifying while purchasing stocks in order to eliminate possible risks, should any sudden stock market changes occur. If you are a serious investor, planning to include stock trading in your portfolio, ITS is definitely a company you might consider.
